Kunal Vijayvargiya

Jaipur, Rajasthan | Kunalvj19@gmail.com | github.com/Kunalvj19

PROFESSIONAL SUMMARY

Motivated and detail-oriented BCA student with hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in JavaScript, Python, Java, C/C++, REST API development, JWT authentication, and responsive front-end design with Tailwind CSS. Demonstrated ability to architect, deploy, and maintain production-grade projects on Vercel and Render. Strong foundation in Data Structures, SQL/NoSQL databases, Git version control, and agile problem-solving. Seeking an internship or junior developer role to deliver impactful software solutions and grow within a collaborative engineering team.

SKILLS

Languages:	JavaScript (ES6+), Python, Java, C, C++
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, Axios, React Router DOM
Backend:	Node.js, Express.js, REST APIs, JWT Authentication, Bcrypt
Database:	MongoDB (Mongoose, Atlas, Compass), SQL
Tools & Deployment:	Git & GitHub, Vercel, Render, dotenv, Postman, Nodemon
Concepts:	MERN Stack, CRUD Operations, Authentication, Protected Routes, MVC

PROJECTS

Smart Quiz System (MERN Stack — MongoDB · Express.js · React.js · Node.js)

- Engineered a full-stack MCQ quiz platform with secure user **registration and JWT-based authentication**, implementing bcrypt password hashing and protected React routes to ensure zero unauthorized access.
- Built dynamic quiz attempt engine with real-time scoring, performance summaries, and a **competitive leaderboard** — managing all state via React Hooks (useState, useEffect) and Axios for frontend-backend communication.
- Designed **MongoDB + Mongoose schemas** for users, quizzes, and attempt history; implemented complete CRUD operations with Express.js REST APIs, CORS configuration, and environment variable management.
- Deployed frontend on **Vercel** and backend on **Render**; applied responsive UI design with Tailwind CSS and maintained full project lifecycle using Git & GitHub version control.
- Live Demo https://smart-quiz-system-zeta.vercel.app/

Personal Portfolio Website (React.js · TypeScript · Node.js · MongoDB · Tailwind CSS)

- Developed a **full-stack personal portfolio** using React.js with TypeScript for type-safe component architecture, featuring project showcases, skills section, and a contact form with live backend validation.
- Built a **Node.js + Express REST API** backend connected to MongoDB Atlas to handle contact form submissions, storing messages with timestamps and enabling admin retrieval — demonstrating end-to-end MERN proficiency.
- Implemented **responsive design** with Tailwind CSS, smooth page transitions, and reusable TypeScript interfaces/components, ensuring consistent rendering across all device breakpoints.
- Configured **environment-based deployments** (Vercel for frontend, Render for API), integrated dotenv for secure credential management, and structured the codebase following MVC separation of concerns.

EDUCATION

Bachelor of Computer Application (BCA) | University of Rajasthan, Jaipur — Pursuing — 2023–2026

Senior Secondary — RBSE (12th) — 2022–2023 | 79%

Secondary — RBSE (10th) — 2020–2021 | 88%

CERTIFICATIONS

- Basics of Python Programming (Online Course)
- Introduction to Web Development — HTML, CSS, JavaScript
- Fundamentals of Computer Applications
- SQL(Intermediate)
- Software Engineer Intern
- CSS (Basics)
